

1. Define the problem

- Want an app where you can search a song by title and artist, and it will show the lyrics.

2. User Story

- As a user, I can type in a title and pull up a list of songs with that title
- As a user, I can specify the artist and title and have that specific song lyrics pop up
- As a user I can add lyrics to a list of my favorite songs
- As a user, I can add a URL to a favorited song to link to that song

3. UI
